FINAL FREE PLANT OFFER FOR 1942

THIS OFFER IS GOOD FOR A LIMITED TIME ONLY

ORDER AT ONCE — ALL ORDERS WILL BE FILLED IN ROTATION

This is my final free plant offer for 1942 and all such offers will be withdrawn very soon, since the field in which these plants have been growing is now nearly cleared.

The offers now made are the most remarkable of all. So far as I can see now, there will be no Fall clearance sale of the Tall Bearded or Autumn Flowering Iris this year and no sale of them next Spring, so that this is the last chance to take advantage of bargain offers. **ORDER NOW AND SAVE MONEY AND GAIN A YEAR'S GROWTH.** All plants will be as fine as any I have ever grown.

A REAL IRIS BARGAIN

IN TALL BEARDED AND AUTUMN FLOWERING IRIS
ASSORTED

For Those Who Do Not Require Each Plant Labeled

25 CHOICE VARIETIES **\$2.50**
ASSORTED — NOT LABELED

**MY CHOICE OF VARIETIES IN A FULL COLOR
SELECTION AND LONG FLOWERING SEASON**

50 CHOICE VARIETIES **\$5.00**
ALL DIFFERENT

One of the greatest time consuming devices is tying labels on thousands of plants and with the shortage of labor, time becomes an important factor. Besides, we probably will soon be unable to get labels on account of the wire used to fasten them to the plants. Wouldn't be at all surprised if another year we will have to ship everything without labels. At present we have enough labels for all Iris that are ordered labeled, but here is a chance to get a lot of choice plants at half price, or less, without labels. For those who do not require each plant labeled, but merely wish an extravaganza display of colors, this is a money saving collection. It will include varieties that give a very long flowering season, May, June and September. Each plant will be a different variety and a full range of colors will be included. Each collection will include Early Flowering varieties, Autumn Flowering varieties, Hardy Pogocyclus Hybrids, etc.

The surprise element will be one of the pleasant factors in buying this collection. There will be pink and red tones, blue and purple tones, whites, blends, etc., and many will be delightfully fragrant. ORDER AS MANY COLLECTIONS AS YOU WISH.

12 VARIETIES OF APPLES ON ONE TREE

24 DIFFERENT VARIETIES ON 2 TREES

\$20.00 EACH

LARGE SPECIMEN TREES READY TO BEAR
THE LATEST AND GREATEST SENSATION

For those who may be interested in this Marvel of Horticulture, I have only a limited quantity for delivery this Fall and next Spring. I do not at present have enough of them to list in my catalogue, and expect they will be all sold before time for delivery comes around.

The parent trees are the Dark Red Delicious, and they are now bearing fruit. Eleven other varieties are "budded" into these Dark Red Delicious Trees so that there will be 12 branches, each branch bearing a different variety of fruit. The trees are now about 10 feet high and the finest trees were selected from a large block for this special "budding" process so that each tree will be symmetrical and nicely branched. After a year to become established in their new location the trees will be ready to produce fruit — 12 different varieties of apples all on one tree, 24 different varieties on 2 trees — red apples, yellow apples, early apples, late apples, sweet apples, tart apples, eating apples, cooking apples — in all the best known varieties. You may pick apples from July until frost — loads of them.

To produce these fine trees to such perfection requires a great deal of work and expert care and it is necessary to get \$20.00 each for them, but I believe they will add \$1000.00 value to any property where they are planted. Certainly they will prove to be a sensation wherever they are planted, besides being immensely practical from a standpoint of utility and beauty.

This is not an expense but an investment as they will pay for themselves in delicious fruit over and over again, year after year, for a full lifetime, and there is no more lovely spring flowering tree than an apple tree.

WORLD'S FINEST SIBERIAN IRIS

This is not only a very unusual collection; it is indeed, in my opinion, the finest collection of Siberian Iris obtainable anywhere in the world at any price. I will include in this collection varieties that originally sold at from \$5.00 to \$25.00 for a single plant. The richest Royal Purples, pure snow whites, soft and medium blues, red tones, etc., unlabelled.

Many eminent authorities consider the Siberian Iris the most elegant of the Iris family. They are prodigious bloomers, an established plant often producing 50 or more flowering stalks, with hundreds of flowers open at one time. They are of the easiest possible culture and once planted will take care of themselves anywhere. No garden should be without these beauties when they can be had at such nominal cost.

POT GROWN "MASTODON" EVERBEARING STRAWBERRIES

FOR PLANTING NOW

The "Mastodon" is generally recognized as the "Best of all" Everbearing Strawberries. The fruit is large and of delicious flavor and it is a reliable producer. Pot grown Strawberries are the most practical for home culture, having all their roots contained in a ball of earth ready to be transplanted without any shock. It is a recognized fact that pot grown plants will produce more berries of larger size. If planted soon these pot grown plants should produce berries this Fall and an abundant crop next year.

Strawberries are hardy even as far north as Alaska and will produce an abundant crop in any good garden soil.
